

**B) WORK EXPERIENCE/PERFORMANCE**

To be undertaken under the relevant 'provisional licence' arrangement with an employer in the workplace, with appropriate supervision and recorded via an approved workplace recording system (e.g. eProfiling). Aspects to be addressed include:

- Language, literacy and numeracy requirements of each competency standard unit;
- Responsibilities of working in an Australian Competency Based Training (CBT) context;
- Wiring and equipment installation in accordance with AS/NZ 3000 Australia/New Zealand Wiring Standards and related standards;
- Multiple Earth Neutral (MEN) system;
- Standards and codes of practice for working with electrical installations and equipment;
- Verification and testing of installation wiring and equipment;
- Local service and installation rules; and
- Occupational Health and Safety and environmental requirements.

**C) FINAL COMPLIANCE ASSESSMENT**

You must undertake a compliance assessment that is in accordance with the relevant regulatory and industry policy that covers verifying the safety and compliance of electrical installation wiring and equipment, including the relevant and mandatory tests in Australia and in accordance with the relevant requirements of the jurisdiction.

**STEP 6****GAIN FULL QUALIFICATION**

Once you have successfully completed Steps 1 to 5, you will be granted the Certificate III in Electrotechnology Electrician (UEE30807) from the RTO that delivers the gap training.

**STEP 7****GAIN RELEVANT LICENCE(S) (where applicable)**

You will then need to take your qualification and eProfiling report back to the regulator to be issued with a full electrical licence.

3

## STEP 5

### UNDERTAKE THE IDENTIFIED GAP TRAINING

The RTO will deliver the identified gap training and collect evidence of your on-the-job experiences with an employer via the eProfiling system.

The gap training will include:

- a) Essential knowledge and skills;
- b) Completing the work experience/performance requirements; and
- c) A final compliance assessment.

### A) ESSENTIAL KNOWLEDGE AND SKILLS

This content is delivered by the RTO. Aspects to be addressed include:

- Occupational Health and Safety in Australia;
- Responsibilities in working in an Australian Competency Based Training (CBT) context;
- Reading, writing and numeracy indicators of skills/competencies in each competency standard unit;
- Electrical Safe Working Practice inclusive of applicable local regulatory tests;
- Multiple Earth Neutral (MEN) system;
- Electrical installation – protection methods and devices
- Electrical installation – design and equipment selection; and
- Electrical installation – testing and verification.

## STEP 5

### UNDERTAKE THE IDENTIFIED GAP TRAINING

The RTO will deliver the identified gap training and collect evidence of your on-the-job experiences with an employer via the eProfiling system.

The gap training will include:

- Electrical installation – design and equipment selection; and
- Electrical installation – testing and verification.

## STEP 4

### CONTACT ePROFILING

Australian regulators require evidence that broad experience has been gained on-the-job and require this evidence to be formally gathered and documented. The industry endorsed method of gathering this evidence is the eProfiling system.

eProfiling is an innovative electronic workplace skill development tracking system that records and reports on the work experiences of the learner. eProfiling works by regularly measuring the progress of a learner against industry agreed predetermined advisory targets directly linked to national competency standard units.

To register for eProfiling (e-LogBook) please contact the eProfiling National Office on 1300 477 808. For more information please visit the eProfiling website [www.eprofiling.com.au](http://www.eprofiling.com.au).

Once you have registered you will be issued an e-LogBook registration code and password to allow you to record the details of your work experiences on a weekly basis via the internet. Paper based eProfiling card are also available on request.

## CONGRATULATIONS

Congratulations on successfully completing a skills assessment conducted by VETASSESS in the technical component for the Certificate III in Electrotechnology Electrician (UEE30807) qualification and on being issued with an Offshore Technical Skills Record (OTSR).

An OTSR entitles the holder to a provisional or temporary licence as an electrician depending on the state or territory licensing categories.

To achieve the full Certificate III in Electrotechnology Electrician (UEE30807) gap training, which focuses on the relevant Australian content and standards you must undertake further training in Australia. A period of supervised work experience in Australia is also needed before you can apply for a full licence.

The gap training advice document supplied with your OTSR outlines the requirements to be undertaken on arrival in Australia.

The gap training program will include:

- gaining essential knowledge and skills from a Registered Training Organisation (RTO);
- completing work experience under appropriate supervision and recording it using an approved workplace recording system; and
- passing a compliance assessment that covers verifying the safety and compliance of underground electricity network cable installations, including all the relevant and mandatory tests, in Australia in accordance with the relevant standards of the jurisdiction.

The following information kit has been specifically developed for the trade skill offshore assessments by VETASSESS in the following countries: United Kingdom; India; Sri Lanka; South Africa; and the Philippines for selected trade occupations. This is one of many pathways of general skilled migration to Australia.

The kit provides guidance and relevant information regarding how to progress towards completion of the qualification and issuance of the occupational licence as well as other useful information you may need to know about the Australian electrotechnology industry and training sector.

### STEP 3

#### FIND AN EMPLOYER

Once you have arrived in Australia you must find an employer. An employer can be found via a number of ways:

- check the jobs section of local papers;
- check employment websites;
- contact your local employer/employee association; and
- Centrelink job search.

Table 4 lists the contact details for electrical industry employer and employee representative associations.

### OVERVIEW OF THE PROCESS IN AUSTRALIA

NOTE: Steps 2 and 3 can be undertaken concurrently or in reverse order.

### STEP 3

#### FIND AN EMPLOYER

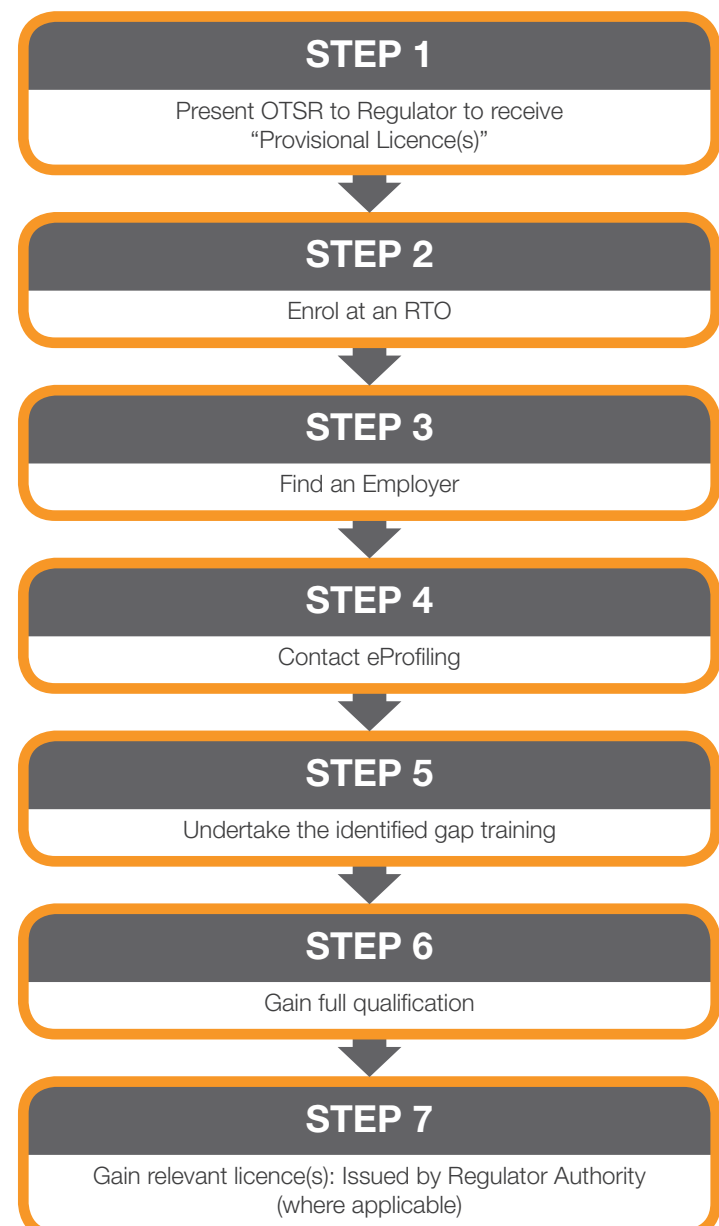

Once you have arrived in Australia you must find an employer. An employer can be found via a number of ways:

- check the jobs section of local papers;
- check employment websites;
- contact your local employer/employee association; and
- Centrelink job search.

Table 4 lists the contact details for electrical industry employer and employee representative associations.

### OVERVIEW OF THE PROCESS IN AUSTRALIA

NOTE: Steps 2 and 3 can be undertaken concurrently or in reverse order.

## STEP 1

### GO TO YOUR LOCAL REGULATOR AND PRESENT YOUR OTSR TO BE ISSUED WITH A PROVISIONAL OCCUPATIONAL LICENSE/PERMIT TO ALLOW YOU TO WORK IN AUSTRALIA

The Offshore Technical Skills Record (OTSR) lists the technical skills that have been demonstrated against the UEE30807 Electrotechnology Electrician qualification. It also lists the gap that needs to be bridged to meet the achievement of all the competency standard units comprising the qualification and to meet the full requirements of the UEE30807 qualification.

Australian ElectroComms and EnergyUtilities regulators have agreed to provide a provisional (restricted) licence or permit upon presentation of an OTSR. This permit allows candidates to work in Australia under the supervision of an employer, while the 'Australian knowledge' component of each competency standard unit is completed.

The contact details for each of the Australian industry regulators are included in Table 1.

## STEP 2

### ENROL AT AN RTO

Registered Training Organisations (RTOs) will view the OTSR as evidence of your prior learning contributing to the qualification. Participating RTOs in each state or territory will deliver the identified gap training to meet the qualification and licensing requirements. This training is provided for a fee that is determined by the RTO. A list of participating RTOs is included in Table 2 and 3.

You are required to undertake the identified gap training and gain the required workplace experience, under the supervision of an employer.

Once you have successfully completed the necessary training, both at the RTO and in the workplace, the RTO will issue your qualification – a Certificate III in Electrotechnology Electrician.

**TABLE 2:**

## STEP 2

### ENROL AT AN RTO

Registered Training Organisations (RTOs) will view the OTSR as evidence of your prior learning contributing to the qualification. Participating RTOs in each state or territory will deliver the identified gap training to meet the qualification and licensing requirements. This training is provided for a fee that is determined by the RTO. A list of participating RTOs is included in Table 2 and 3.

You are required to undertake the identified gap training and gain the required workplace experience, under the supervision of an employer.

Once you have successfully completed the necessary training, both at the RTO and in the workplace, the RTO will issue your qualification – a Certificate III in Electrotechnology Electrician.

**TABLE 2:**
